

I sent out a document for review and got back 10 different versions. What do I do now?

Every business user struggles with document chaos, and Microsoft® SharePoint® was designed to alleviate these obstacles. But getting people to change their work habits and embrace SharePoint is a challenge.

harmon.ie is an Outlook® sidebar that provides full-featured access to Microsoft SharePoint, from within email.

harmon.ie encourages people to adopt centralized document management by providing transparent access to SharePoint documents, directly from Microsoft Outlook.

Product Features

Automatically **replace attachments with links** and send email, in one step.

Drag email attachments or entire email messages to publish them on SharePoint.

Share documents easily using links in your email message, calendar appointment, or task.

Locate a document using back/forward navigation, history, and favorites, just like in a Web browser.

Search the contents of documents in your current SharePoint site or library.

Right click to check out and edit a document. When you're done making edits, check in your changes.

Edit document properties, directly from Outlook. When you're finished, harmon.ie will remind you to check in your changes.

Approve documents, view the document history, and more.

harmon.ie for Sharepoint Enterprise

Harmon.ie for SharePoint Enterprise encourages SharePoint adoption within the enterprise by making document sharing easy and intuitive for all business users. The Enterprise release provides advanced integration capabilities with SharePoint that enable Outlook users to do the following from within email: manage and share project emails on SharePoint, with email headers mapped to SharePoint columns; correspond in real-time with SharePoint document authors and editors using Office Communications Server; and access SharePoint-based social networks. It also supports centralized deployments as well as provisioning SharePoint sites configured according to enterprise standards.

System Requirements

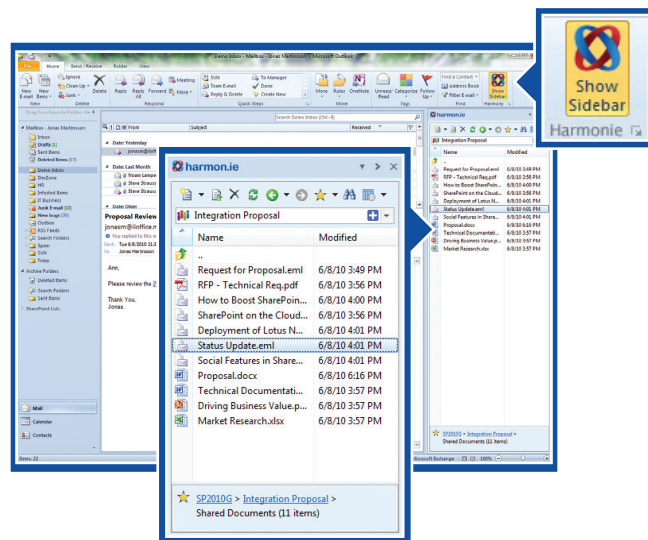

Microsoft Office Outlook 2010 or 2007 (SP2 is recommended).

Microsoft Windows 7, or Microsoft Windows Vista Business, Enterprise or Ultimate Edition, or Microsoft Windows XP Professional.

Windows SharePoint Services (WSS) version 3.0, Microsoft Office SharePoint Server (MOSS) 2007, SharePoint 2010, or Microsoft SharePoint Online.

Plug into the Microsoft Cloud

Mainssoft supports Microsoft SharePoint Online, as well as hosted solutions for Windows SharePoint Services (WSS) 3.0, Office SharePoint Server (MOSS) 2007 and SharePoint 2010. Asynchronous drag-and-drop operations ensure that the Outlook application remains responsive when the user accesses or stores large documents.

About harmon.ie

harmon.ie (pronounced 'harmony') brings document collaboration to every business user by transforming the email client into a collaboration and social workspace, called 'social email'. Hundreds of businesses already use harmon.ie to vastly increase user adoption of SharePoint or Google Docs™ for document sharing, collaboration, and social networking. harmon.ie is the newest product line from Mainssoft, which has been building cross-platform enterprise software since 1993.
